# About Us

## About CAA Sensors

At CAA Sensors, we're redefining how industrial facilities manage and monitor their utility systems. Specialising in the monitoring and optimisation of critical utilities, our advanced sensor technologies deliver real-time, actionable insights that drive efficiency, reliability, and sustainability across industrial operations.

Built for the demands of modern industry, our solutions help uncover hidden inefficiencies—like leaks, pressure drops, and energy waste—before they become costly problems. Whether you're aiming to improve uptime, reduce energy consumption, or meet ESG goals, our monitoring platform gives you the data visibility you need to take control of your utilities infrastructure.

From factories and food processors to mining and manufacturing, CAA Sensors empower maintenance, engineering, and sustainability teams to make smarter decisions—backed by hard data.

## Products

We provide a full range of products to measure and monitor site utilities including sensors for:

- Electricity
- Water
- Natural gas
- Compressed air
- Steam
- Liquids
- Industrial gases
- Temperature
- Flow
- Pressure

## Product Features

CAA Sensors products are suitable for all industrial applications. Our sensors are:

- Accurate
- High quality
- Reliable
- Interconnectable
- Suitable for temporary or permanent applications

Our sensors can be daisy chained together and connected to a local display, our cloud-based monitoring program (GEMS) or your SCADA.

## Our Difference

Our product range is backed up with over a decade of experience working directly with industrial systems and utilities. We are leaders in leakage surveys, system audits, training, monitoring, measurement, repairs and system upgrades.

## More Information

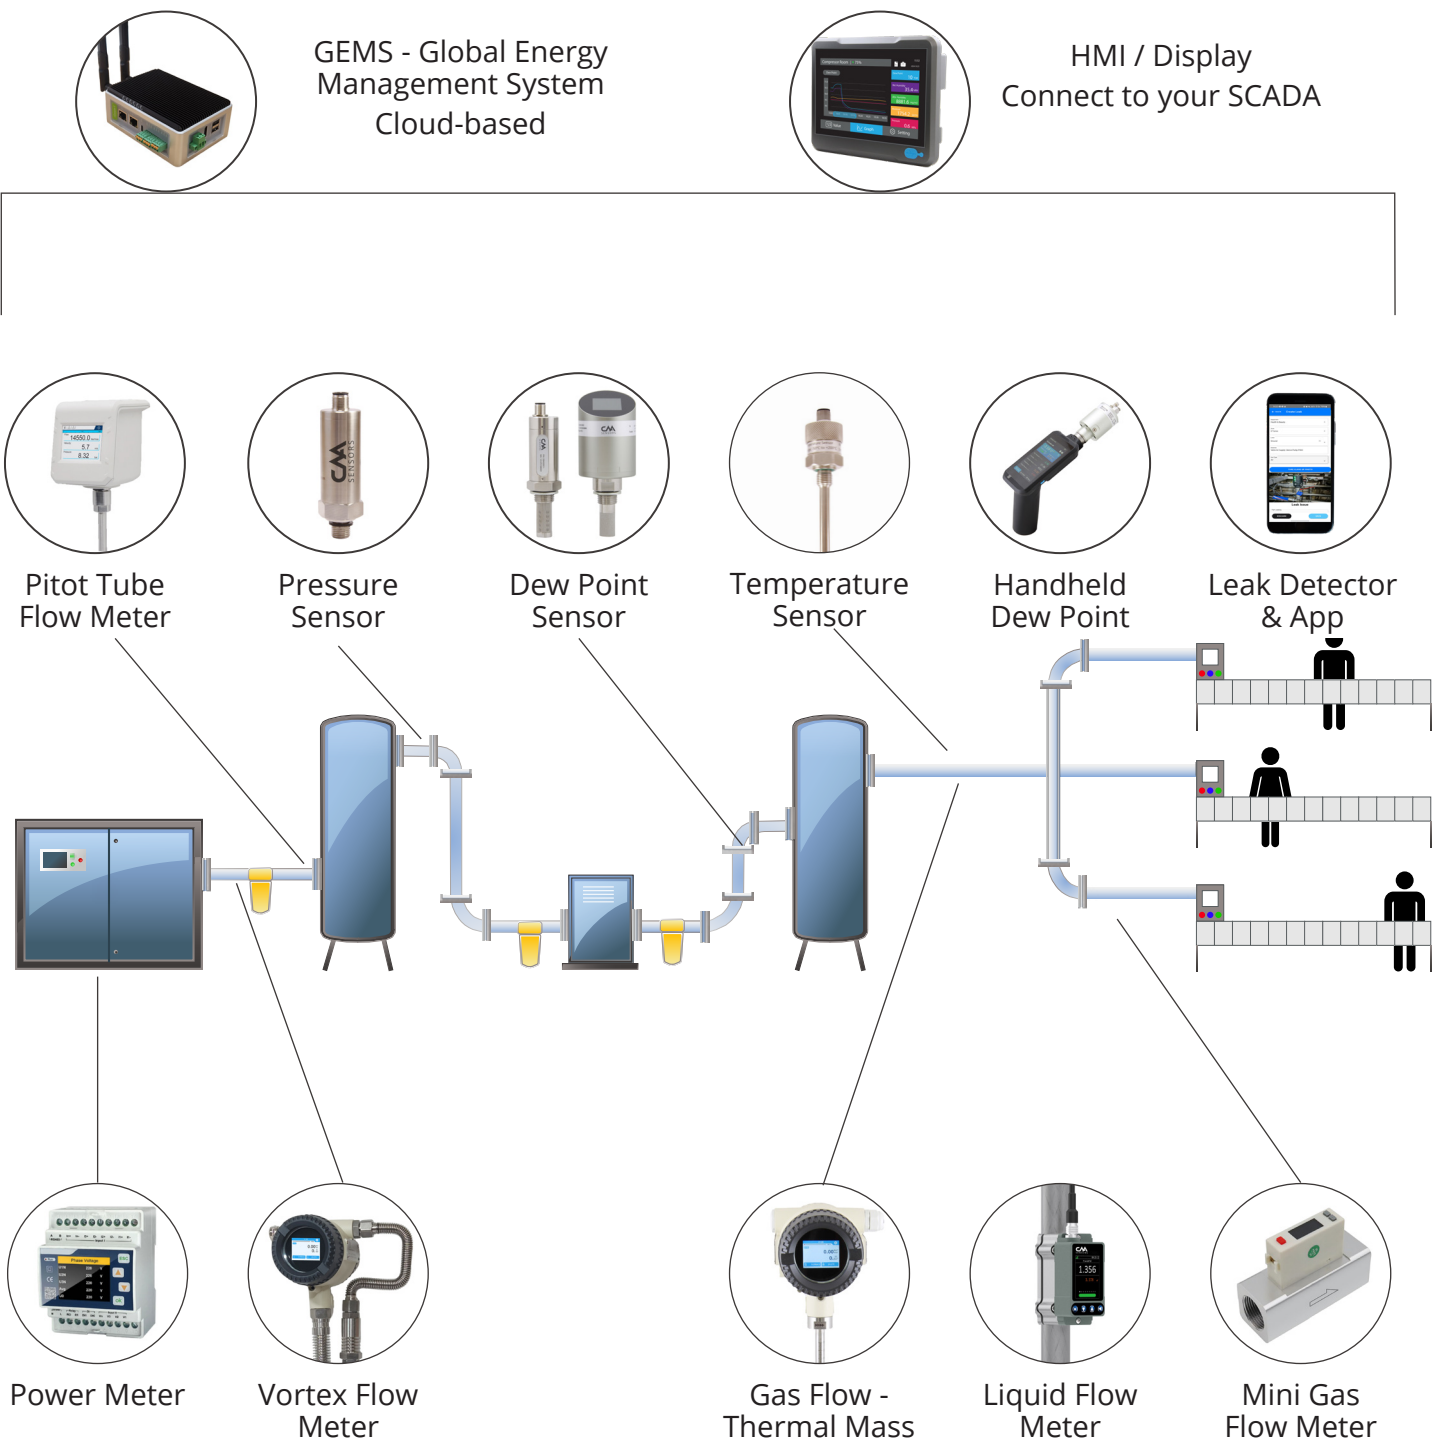

For more information on CAA Sensors products:

- visit our website: [www.caasensors.com](http://www.caasensors.com)
- email us at: [sales@caasensors.com](mailto:sales@caasensors.com)
- or call us: +61 494 095 632

# Where to Install

The diagram below shows where our sensors & equipment can be installed

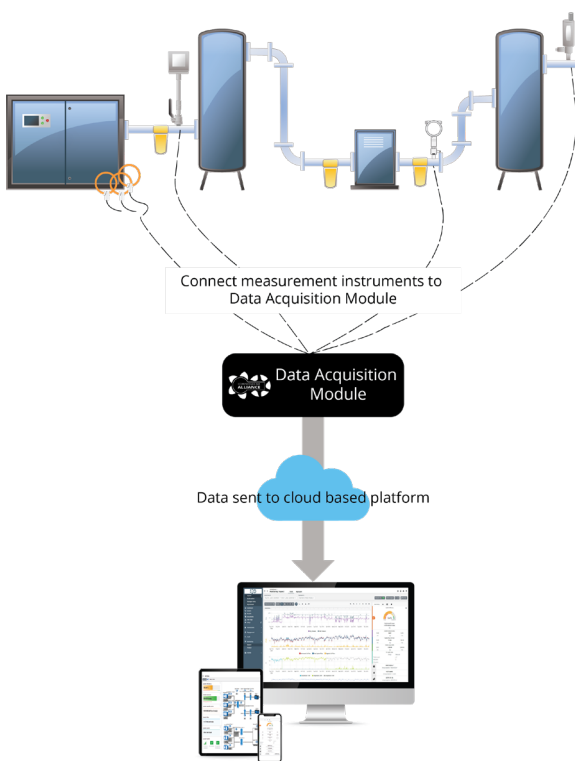

# GEMS - Global Energy Management System

Remotely monitor and measure your site utilities

More Information

Data Acquisition Module

The Global Energy Management System (GEMS) is our cloud-based approach for measuring and monitoring all your utilities including: compressed air, gas, steam, electricity and water usage.

## Key Features

- Robust industrial design for industry and manufacturing
- Easy to install and set up
- Data available in real time, 24 hours per day, 7 days per week
- Access data on your computer or phone via an internet connection
- High data frequency and endless logging capacity
- Set alarms with SMS and/or email notifications
- Set service schedules and notifications
- Document system schematics
- Receive monthly reports
- Track performance against targets
- Secure internet connection between device and web application
- Download data in CSV format
- Remote software upgrade capability
- LTE cellular modem or LAN connection

## Data Module

- Connect up to 20 Modbus devices to one Data Module
- Connect unlimited Data Modules to your cloud platform
- Suitable for temporary and permanent monitoring
- Power requirement = 24vDC

## What do you need to get started?

- 1 or more Data Modules (one-off purchase)
- 1 or more sensors (eg flow meter, dew point sensor, power meter)
- Annual Subscription to GEMS - the cloud based platform

# HMI / Displays

View and log data from multiple sensors

More Information

## HMI / Display and Data Logger for multiple sensors

Connect and view data from multiple sensors

### Display

7" IPS touch LCD, 1280 × 800 resolution

### Inputs

- 2 x RS485 inputs, up to 255 Modbus registers
- 4 x channels:
  - 0-20mA / 4-20mA / 0-1VDC / 0-10VDC
- Wi-SUN wireless communication (optional)

### Outputs

- Modbus RTU (RS485)
- Modbus TCP (Ethernet)
- USB Type-C

### Power

24 - 30 VDC

### Suitable for

- All CAA Sensors products
- Third party sensors with Modbus RTU

### Mounting

- Wall Mount
- Panel Mount

### Alarm

2 x alarm relays

### Data Logging

Up to 2,000,000,000 values

More than 1 year of 1 second data for 60 channels

## HMI / Display for a single sensor

For use with CAA Sensors Flow Meters and Dew Point Sensors

### Display

4.3" TFT LCD, 480 × 272 resolution

### Inputs

Digital - RS485 input

### Outputs

Digital - RS485 input

### Power

85 - 264 VAC

Plug into a wall socket or hard wire

### Suitable for

- CAA Sensors products

### Mounting

- Wall Mount

### Alarm

Optional

### Data Logging

No

# Dew Point Sensors

Measure pressure dew point (PDP), ambient dew point, relative humidity, temperature and pressure.

More Information

## Desiccant / Membrane Dryers & Nitrogen Systems

PDP Range: -110 to +20°C | -166 to +68°F

### Pressure Dew Point Range Options

- -110°C to +20°C (-166°F to +68°F) or
- -80°C to +20°C (-112°F to +68°F)

### Gas Contamination

Minimal contamination

### Power

10 - 30 vDC

### Operating Pressure

Up to 50 bar (725 psi)

### Outputs

Modbus RS485 & 4-20mA

### Accuracy

Up to ±2%

### Options

- Display
- Integrated pressure sensor
- Data cable with M12 connector

## Membrane, Drum, Refrigerant & Hybrid Dryers

PDP Range: -60 to +60°C | -76 to +140°F

### Pressure Dew Point Range

- -60°C to +60°C (-76°F to +140°F)

### Gas Contamination

Some contamination

### Power

10 - 30 vDC

### Operating Pressure

Up to 50 bar (725 psi)

### Outputs

Modbus RS485 & 4-20mA

### Accuracy

±2%

### Options

- Display
- Integrated pressure sensor
- Data cable with M12 connector

## Membrane, Drum & Refrigerant Dryers

PDP Range: -60 to +60°C | -76 to +140°F. Compact sensor

### Pressure Dew Point Range

- -60°C to +60°C (-76°F to +140°F)

### Gas Contamination

Some contamination

### Power

10 - 30 vDC

### Operating Pressure

Up to 50 bar (725 psi)

### Outputs

Modbus RS485 & 4-20mA

### Accuracy

±2%

### Options

- Stainless Steel Casing or
- Aluminium Casing

## High Purity Gases operating below -80°C (-112°F)

PDP Range: -120 to +20°C | -184 to +68°F

### Pressure Dew Point Range

- -120°C to +20°C (-184°F to +68°F)

### Gas Contamination

Minimal to no contamination

### Power

10 - 30 vDC

### Operating Pressure

Up to 17 bar (246 psi)

### Outputs

Modbus RS485 & 4-20mA

### Accuracy

Up to ±2%

### Options

- Data cable with M12 connector

## Outdoor Sensor - IP67 rating and Display

PDP Range: -110 to +60°C | -166 to +140°F. Outdoor or harsh environments

### Pressure Dew Point (PDP) Range Options

- -110°C to +20°C (-166°F to +68°F) or
- -60°C to +60°C (-76°F to +140°F)

### Gas Contamination

Minimal contamination

### Power

16 - 30 vDC

### Operating Pressure

Up to 50 bar (725 psi)

### Outputs

Modbus RS485 & 4-20mA

### Accuracy

Up to ±2%

### Options

- Integrated pressure sensor

## Hand-held, Portable Dew Point Meter

Ideal for temporary measurements

### Pressure Dew Point (PDP) Range Options

- -110°C to +60°C (-166°F to +140°F) or
- -60°C to +60°C (-76°F to +140°F)

### Gas Contamination

Minimal contamination

### Power

Rechargeable lithium battery

### Operating Pressure

Up to 17 bar (246 psi)

### Outputs

USB

### Accuracy

Up to ±2%

### Included

Measurement Chamber, teflon tube, charger, quick connect, data logger

### Data Logger

200 million recording points

## Wall Mount with Alarm and Large Display

Ideal for situations that need a large display and audio-visual alarm

### Pressure Dew Point (PDP) Range Options

- -110°C to +20°C (-166°F to +68°F) or
- -80°C to +20°C (-112°F to +68°F) or
- -60°C to +60°C (-76°F to +140°F)

### Power

110 - 240 vAC

### Operating Pressure

Up to 17 bar (246 psi)

### Outputs

- 4-20mA output
- Alarm relay

### Accuracy

Up to ±2%

### Included

Power cable, teflon tube, alarm light & siren

### Options

- Integrated pressure sensor

# Flow Meters - Gas/Steam

Gas and steam meters

Measure flow, consumption and temperature

More Information

## Flow Meter Locations

## Vortex Flow Meter (Gas and Steam)

Install on compressor outlets, steam systems or dirty gases

### Material Quality

Gas - saturated, wet and dirty  
Steam

### Power

18 - 30 vDC

### Operating Pressure

Up to 63 bar (913 psi)

### Gas Flow Range

1.5 - 300 Nm (5 - 984 ft/sec)

### Outputs

Modbus RS485 & 4-20mA

### Connection and Pipe Size

Inline style (Flange or R-Thread): DN15 to DN300

### Accuracy

$\pm(1.5\% \text{ RD} + 0.3\% \text{ FS})$

## Pitot Tube (Gas)

Ideal for damp or lightly contaminated gas. Install before a dryer

### Gas Quality

Wet and dirty gas (non-condensing)

### Power

18 - 30 vDC

### Operating Pressure

Up to 17 bar (246 psi)

### Gas Flow Range

5 - 300 Nm (17 - 984 ft/sec)

### Outputs

Modbus RS485 & 4-20mA

### Connection and Pipe Size

Insertion style: DN25 to DN600

### Accuracy

$\pm(1.5\% \text{ RD} + 0.3\% \text{ FS})$

### Bi-directional

Optional

## Mini Flow Meter (Gas)

Ideal for point of use monitoring. Install in dry gas

**Gas Quality**

Dry, clean gas

**Power**

24 vDC

**Operating Pressure**

Up to 16 bar (232 psi)

**Gas Flow Range**

0.1 - 250 Nm (0.3 - 820 ft/sec)

**Outputs**

Modbus RS485 & 4-20mA

**Connection and Pipe Size**

Inline style: DN3 to DN40

**Accuracy**

±(1.5% RD + 0.3% FS)

## Compact Flow Meter (Gas)

Affordable flow meter for point of use monitoring. Install in dry gas

**Gas Quality**

Dry, clean gas

**Power**

18 - 30 vDC

**Operating Pressure**

Up to 15 bar (217 psi)

**Gas Flow Range**

10-1000 L/min (1/2" connection)

20-2000 L/min (3/4" connection)

30-3000 L/min (1" connection)

60-6000 L/min (1.5" connection)

**Outputs**

Modbus RS485

**Connection and Pipe Size**

Inline style: DN15 to DN40

**Accuracy**

±3% FS

## Thermal Mass (Gas)

For dry, clean gas. Install in clean, dry gas (eg after a dryer)

**Gas Quality**

Dry, clean gas

**Power**

18 - 30 vDC

**Operating Pressure**

Up to 50 bar (725 psi)

**Gas Flow Range**

0.1 - 250 Nm (0.3 - 820 ft/sec)

**Outputs**

Modbus RS485 & 4-20mA

**Connection and Pipe Size**

Insertion style: DN25 to DN600

Inline style (Flange or R-Thread): DN15 to DN80

**Accuracy**

±(1.5% RD + 0.3% FS)

## Outdoor Thermal Mass (Gas)

Ideal for outdoor or harsh environments. Install in clean gas. IP67 rating

**Gas Quality**

Dry, clean gas

**Power**

18 - 30 vDC

**Operating Pressure**

Up to 50 bar (725 psi)

**Gas Flow Range**

0.1 - 250 Nm (0.3 - 820 ft/sec)

**Outputs**

Modbus RS485 & 4-20mA

**Connection and Pipe Size**

Insertion style: DN20 to DN300

Inline style (Flange or R-Thread): DN15 to DN80

**Accuracy**

±(1.5% RD + 0.3% FS)

# Flow Meters - Liquids

Industrial water, domestic water and non-aggressive liquids  
Measure flow and consumption

More Information

## Electromagnetic Flow Meter

Electromagnetic flow meter for industrial water and non-aggressive liquids

### Liquid Quality

- Electrically conductive, non-corrosive liquids
- Industrial and domestic water
- Sea and salt water
- Sewage, sludge

### Minimum Flow

0.5m/s

### Power

24 vDC

### Outputs

Modbus RS485 & 4-20mA

### Connection and Pipe Size

Inline style (Flange): DN15 to DN150

### Accuracy

±0.5%

### Operating Pressure

Up to 16 bar (232 psi)

## Clamp on Ultrasonic Flow Meter

Clamp on unit with display. For small pipes

### Liquid Quality

- Clean liquids with minimal bubbles or solids
- Industrial and domestic water
- Sea and salt water

### Minimum Flow

0.1m/s (0.328 ft/s)

### Power

24 vDC

### Outputs

Modbus RS485 & 4-20mA

### Connection and Pipe Size

Clamp-on: DN6 to DN100

### Accuracy

±2%

## Ultrasonic Flow Meter

Wall mount display with clamp-on transducers. For larger pipes

### Liquid Quality

- Clean liquids with minimal bubbles or solids
- Industrial and domestic water
- Sea and salt water

### Minimum Flow

0.1m/s (0.328 ft/s)

### Power

24 vDC

### Outputs

Modbus RS485 & 4-20mA

### Connection and Pipe Size

Clamp-on: DN25 to DN5000

### Accuracy

±0.5%

# Power Meters

Measure amps (A), voltage (V), kilowatts (kW), kilowatt hours (kWh), power factor (PF) and more

More Information

## 3 Phase Power Meter - Din Rail mounting

Monitor your mains power supply, sub loads or individual equipment

### Inputs

- Input voltage up to 600 vAC
- Input current up to 9,999 Amps

### Features

Three phase or single phase measurement  
Display  
Alarm relay

### Power

24 vDC

### Outputs

Modbus RS485  
Over 220 channels available

### Accuracy

±0.5%

### Rogowski Coils included. Choose from:

- 500 amps
- 1,000 amps
- 3,000 amps

## 3 Phase Power Meter - Panel Mount

Monitor your mains power supply, sub loads or individual equipment

### Inputs

- Input voltage up to 600 vAC
- Input current up to 9,999 Amps

### Features

Three phase or single phase measurement  
Display  
Alarm relay

### Power

18 - 36 vDC

### Outputs

Modbus RS485  
Over 220 channels available

### Accuracy

±0.5%

### Rogowski Coils included. Choose from:

- 500 amps
- 1,000 amps
- 3,000 amps

## Rogowski Coil with Modbus or 4-20mA Output

Single phase - Amps (Current) only

### Inputs

- Input voltage up to 600 vAC
- Input current up to 9,999 Amps

### Features

Single phase - measure Amps (A)  
Perfect for temporary measurement

### Power

24 vDC

### Outputs

Modbus RS485 OR 4-20mA

### Accuracy

±0.5%

### Rogowski Coil Options

- 500 amps
- 1,000 amps
- 3,000 amps

# Pressure & Temperature

Pressure sensors for wet and dry gas

Temperature sensors for gases, liquids, ambient air

More Information

## Pressure Sensors for Gas and Non-Aggressive Liquids

Pressure Range: 16 bar (232 psi) or 50 bar (725 psi)

### Pressure Range Options

- 0 to 16 bar (232 psi)
- 0 to 50 bar (725 psi)

### IP Rating

IP65

### Power

24 vDC

### Outputs

- 0 to 16 bar sensor has Modbus RS485 & 4-20mA
- 0 to 50 bar sensor has 4-20mA only

### Accuracy

±1%

### Options

- Data cable with M12 connector

## Temperature Sensors for Gas, Liquid and Air

Measurement Range: -50 to +200°C | -58 to +392°F

### Pressure Range

- -50°C to +200°C
- -58°F to +392°F

### IP Rating

IP65

### Power

24 vDC

### Outputs

Modbus RS485 OR 4-20mA

### Accuracy

±0.5% FS

### Options

- Data cable with M12 connector

# ModuMesh

Wirelessly transmit Modbus RS485 data from sensors to a display or data acquisition module

More Information

## 3 Phase Power Meter - Din Rail mounting

Monitor your mains power supply, sub loads or individual equipment

### Radio Frequencies

- 868MHz (EU)
- 902-928MHz (Americas, Asia and Australia).

### Range

Up to 1 km (line of sight)

### Data Encryption

Encrypted communications by AES 128bits

### Power

9 to 30 vDC

### IP Rating

IP54

### How many ModuMesh do I need?

At a minimum, you need two (2) ModuMesh devices:

- one Primary Controller (connected to the Modbus Master, eg a display or data acquisition module) and
- one Node (connected to sensors)

# Leak Detection

Find and record leaks in compressed air, gas and steam systems

More Information

## Ultrasonic Leak Detector

Find leaks in compressed air, gas and steam systems

### Description

- Basic Ultrasonic Leak Detector
- Simple to use, no screen to distract you

### Power

1 x 9v Alkaline Battery  
Up to 10 days operation on one battery

### Handset weight

0.3 kg (11 oz)

### Includes

Handset, headphones, focusing probes and carry case

## Leak Survey App

Record leaks and parts. Download reports

### Simple to use

- Record leaks, inappropriate use and other opportunities
- Take photos
- Record parts required to fix leaks
- Quantify leak costs (cost and flow rate)
- Create customised reports
- Download reports
- Download parts lists

### Leak App

- Android and iOS phones
- Use with any leak detector

# Accessories

Connectors, sensor cables, hot tap drill, portable measurement, power adapters and more

More Information

## Connectors and Cables

Get your sensors connected and powered

### M12 Connectors

- 5 pins, A-coded
- Female straight, Male straight, Tees, Y's
- Rated Voltage: 60V AC/DC
- Rated Current: Max 4A

### M12 to M8 adapter

- M8 female straight (B-coded)
- M12 male straight (A-coded)
- 0.6m cable

### Cables

- 5 cores
- Wire Colours: Black, Grey, Blue, Brown, White
- Unshielded
- Cable Specification: N\*0.34mm<sup>2</sup>
- Rated Voltage: 125 V AC/DC
- Outer Insulation (Jacket): Black PVC
- 5 meter, 10 meter or 30 meter lengths
- M12 female or male connectors on either end

## Hot Tap Drill

Hand drill connection points on pressurised pipes

### Pressurised Pipe

Hot tap drill can be operated under pressure up to 20 bar (290 psi)

### Drilling Depth

200 mm or 7.87"

### Options

Tapping saddles / clamps  
Ball valves

### Interchangeable Drill Bits

- 8.5mm (1/4") drill bit suits 1/4" ball valve
- 14.5mm (1/2") drill bit suits 1/2" ball valve
- 19.5mm (3/4") drill bit suits 3/4" ball valve
- 24.5mm (1") drill bit suits 1" ball valve

## Power Adapter

Convert 100-240vAC to 24vDC

### Power

- Input: 100-240vAC input (50/60 Hz)
- Output: 24vDC
- 50W
- 2.1 Amp

### Features

- Interchangeable plugs – Australia, UK, Europe and USA
- M12, 5 pin female connector
- 1.7m cable length

### Product Warranty

CAA Sensors provides a 1 year warranty for all products listed in this catalogue. For more information, refer to our website: [www.caasensors.com](http://www.caasensors.com)

### Recalibration & Exchange Program

Sensors should be calibrated regularly. We offer a recalibration and exchange service. For more information, refer to our website:  
<https://www.caasensors.com/recalibration>

### Become a Distributor

Please contact CAA Sensors if you are interested in becoming a distributor or reseller of our products.

### More Information

For more information on CAA Sensors products:

- visit our website: [www.caasensors.com](http://www.caasensors.com)
- email us at: [sales@caasensors.com](mailto:sales@caasensors.com)
- or call us: +61 494 095 632

# How to Order

CAA Sensors sells its products through our global distributor network. Please contact your local distributor for pricing and availability.
